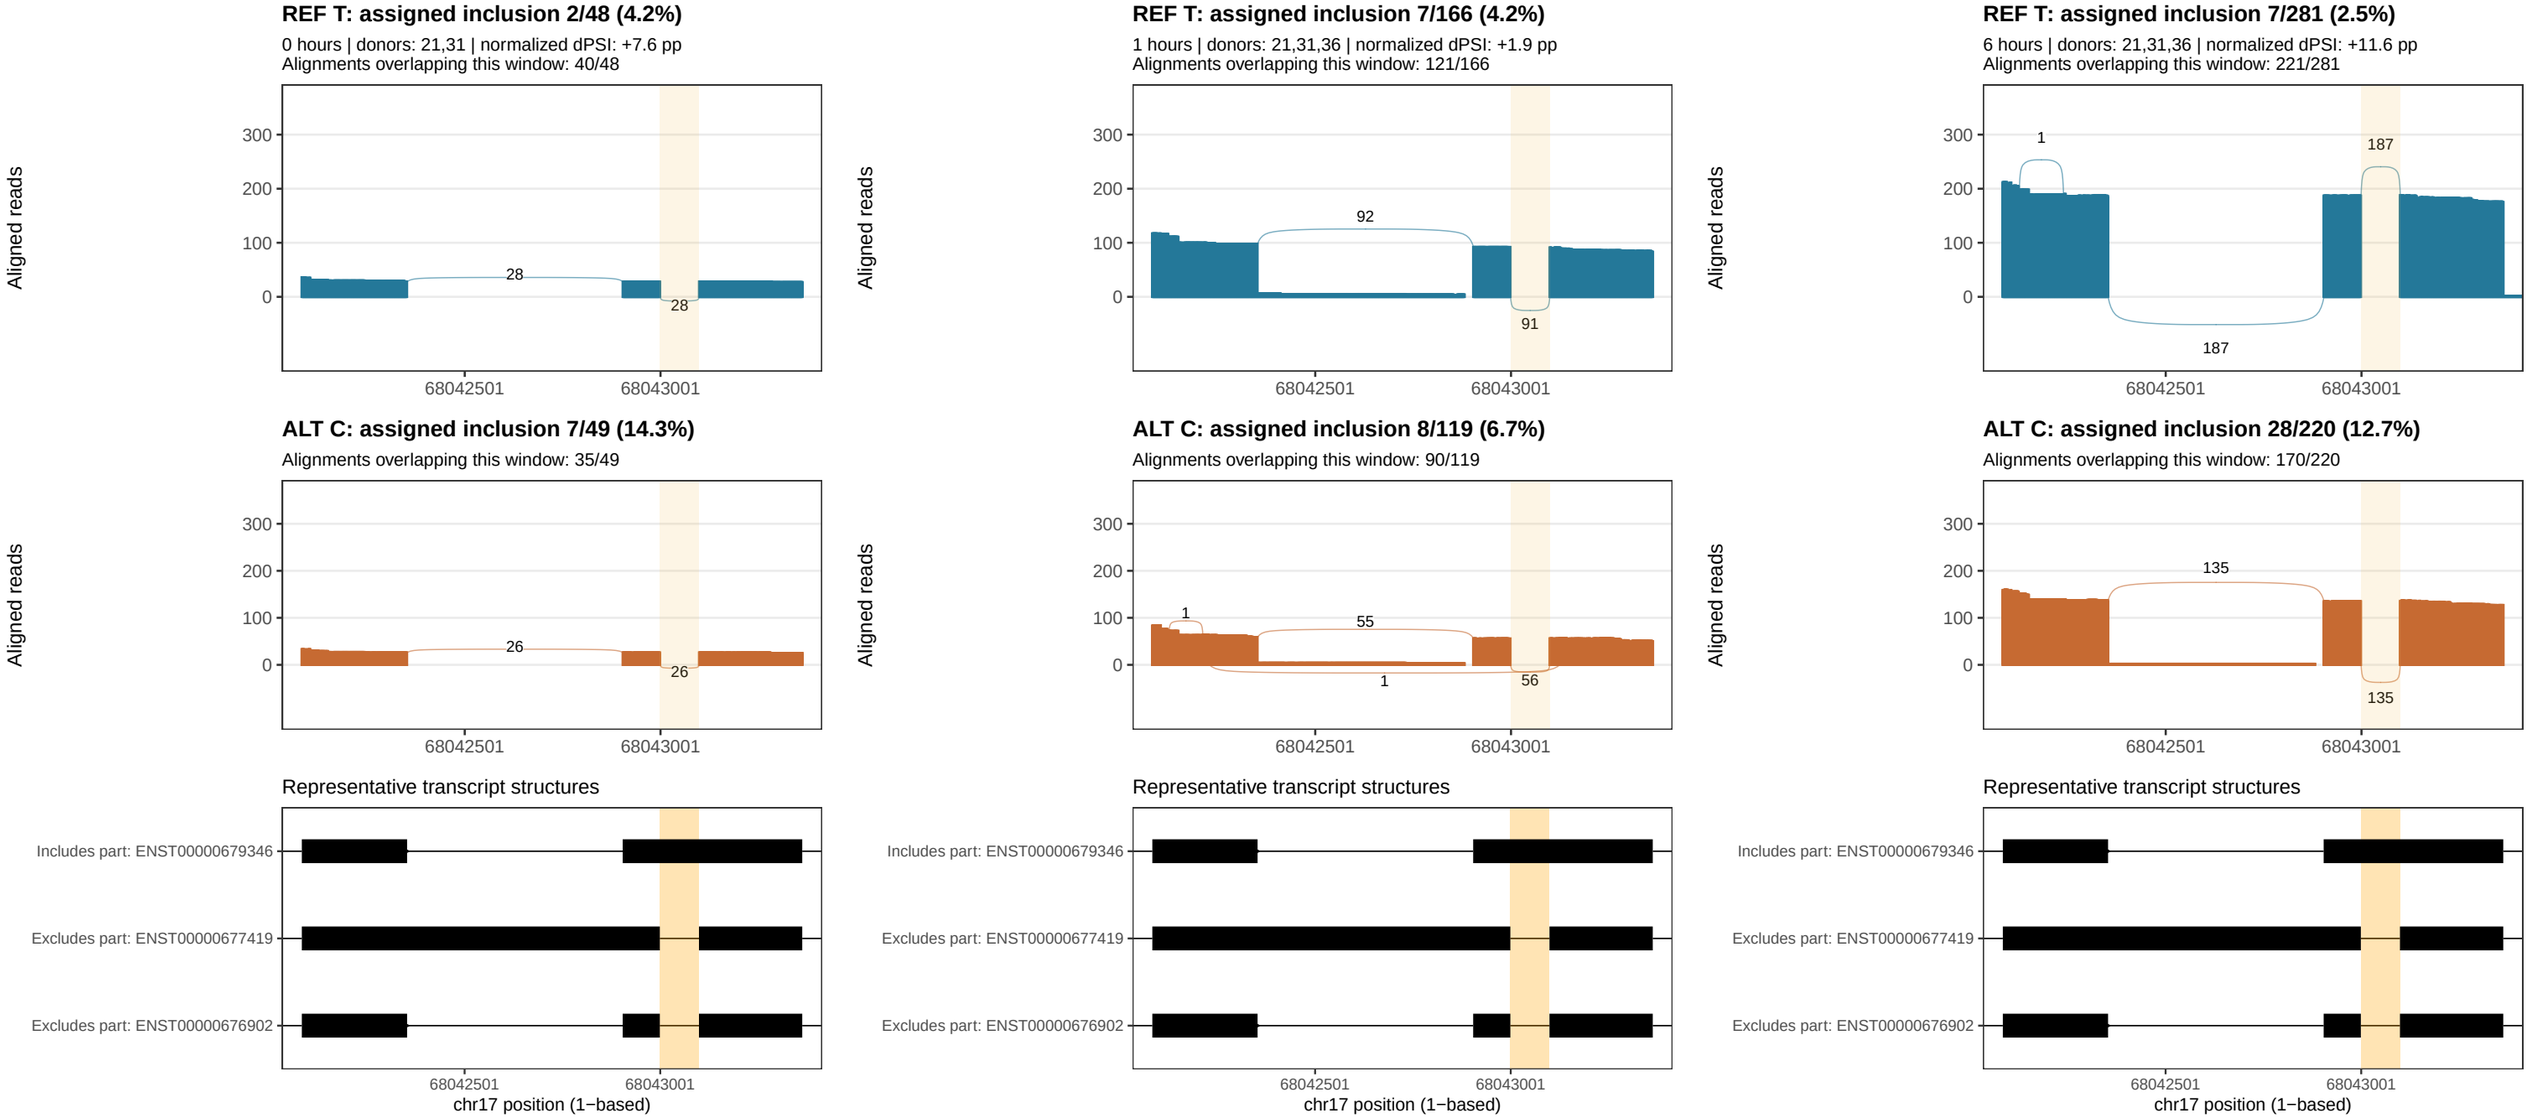
KPNA2: allele−specific read alignments across stimulation

Variant chr17:68035783:T>C (isoLASER 0−based); tested part chr17:68042999−68043099:+ (0−based, half−open). Yellow: tested part.



Coverage and arc labels are raw read counts; all six tracks share a y scale. Arcs: every junction with >=1 read.
Assigned inclusion uses the read's transcript identity; some reads do not reach the local window. dPSI uses donor−normalized tables.
